TELECOMMUNICATIONS AND RADIO ENGINEERING

CONTENTS FOR 1978

Number 1

	Page English	Russian
PART 1 TELECOMMUNICATIONS Volume 32		
ANTENNA-FEEDER DEVICES		
G.Z. Eisenberg and V.G. Yampolskiy: Antennas for Radio Broadcasting, Radio Communication and Television	1	1
M.T. Turusbekov: Calculation of the Effective Area of a Reflecting Passive Repeater	12	15
SATELLITE COMMUNICATIONS		
O.S. Tikhonov, N.A. Kalaychan, A.D. Gorodinskiy, V.A. Parshin, V.Ya. Vaykhonskiy, V.I. Feygin, L.A. Lurye and I.S. Milyavskiy: The "Gradient-N" Channel-Forming Equipment	15	18
TELEVISION		
M.M. Kozlovskiy, L.V. Pogrebnoy and B.V. Altukhov: A Television Transmitter Demodulator for Bands I to V	20	25
E.V. Babkin: A Filter Unit for Making Measurements on Intercity Picture Channels	25	30
DATA TRANSMISSION		
V.S. Gavrilenko, G.A. Chernetskiy and L.A. Chinenkov: The Reduction of Data Signal Power Levels in TF Channels	28	44
N.F. Yushkov: Dual Independent Synchronization in Digital Transmission Systems	32	49
V.G. Grigoryev, S.A. Kuritsyn and V.M. Nechayev: A Method of Generating A Double Differential Phase-Shift Keyed Signal	35	52
AUTOMATIC SWITCHING		
I.M. Gubrenko and I.Z. Ioffe: Remote Control of Type AMT and AMT-69 Pay Telephones	39	56
A.M. Zelinskiy and Yu.N. Kornyshev: Two Models of a System with Repeated Calls	43	60
SIGNAL GENERATION, CONVERSION AND AMPLIFICATION		
B.Yu. Levkov, A.K. Palchikovskiy and P.A. Frolov: Wideband Frequency Multipliers with a High Multiplication Factor in the 0.15 to 5 GHz Band	48	64
M.V. Kondratyev: A Class D Amplifier Used as a Source of Regulated Power	52	68

SIGNAL GENERATION, CONVERSION AND AMPLIFICATION		
B.Yu. Levkov, A.K. Palchikovskiy and P.A. Frolov: Wideband Frequency Multipliers with a High Multiplication Factor in the 0.15 to 5 GHz Band	48	64
M.V. Kondratyev: A Class D Amplifier Used as a Source of Regulated Power	52	68

	Page English	Russian
PART 2 RADIO ENGINEERING Volume 33		
A.I. Tereshchenko: The Action of Microwave Radiation on a Material	56	4
G.A. Andreyev and L.F. Chernaya: Fluctuations in Millimeter-Wave Beams Propagating in a Turbulent Absorbing Troposphere	64	16
V.I. Lebedev: Analysis of Transients in Range and Velocity in a Pulse-Type Radio Range-Finder with Two Integrators	74	30
N.P. Khvorostenko: Facsimile Signal Extractors	79	36
E.L. Pustovoitov and A.S. Sorokin: Integral Distribution of the Minute-Average Noise Power due to an Interfering Radio Signal. Part 1	84	43
L.D. Bakhrakh and O.S. Litvinov: Antenna Aperture Shading Problems	88	48
B.Yu. Levkov: "Passive" Idlers in Varactor Frequency Multipliers	95	56
A.A. Sikarev and V.V. Sobolev: Stability of Signal Processing Algorithms in Digital Data Transmission Systems in Concentrated Noise Conditions	102	65
V.V. Palshkov: Selective Network Output Voltage Overshoot	107	72
BRIEF COMMUNICATIONS		
V.P. Bakalov: Phase-Time Modulation	111	77
V.P. Petrov and M.I. Kamenetskiy: Wave Graphs	115	82
V.Ya. Gyunter and A.A. Kuz'min: A Method of Determining the Parameters of Identical Vertically Symmetrical 2(m + m)-Poles	118	85
O.P. Frolov, I.A. Kozlovskaya and T.L. Gruzinskaya: A Horn Antenna with Controlled Radiation Characteristics	120	87
E.A. Silayev: Potential Instability Regions of Low-Signal Transistor Amplifiers	121	88
N.S. Simin: Measurement of Dielectric Constant Using a Slotted Line Partially Filled with the Dielectric	123	91
V.A. Aksenov and A.I. Goron: Effect of Synchronization Errors on the Density of Magnetic Recording of Code Signals	124	92
V.I. Aliyev and M.V. Strona: Bridge Negative Resistances Using Two Operational Amplifiers	126	95

Number 2

PART 1 TELECOMMUNICATIONS Volume 32		
RADIO BROADCASTING		
V.G. Buryak and T.G. Khvilivitskiy: Parasitic Processes in the Amplifier Stages of High-Power Short-Wave Transmitters	1	1
N.V. Bandura, V.E. Bukhviner, E.E. Dobrovol'skiy and V.G. Khodatai: Controlled Companding Technique in Radio Broadcasting	7	10
V.G. Khodatai and V.M. Shed'ko: Companding with Adaptation to the Broadcast Signal Spectrum	10	13
V.F. Kalyuzhnyi and A.K. Slanov: Interfering Effect of Radio Stations on Balanced Cables	14	21
COMMUNICATIONS NETWORKS AUTOMATIC SWITCHING		
N.A. Bogorodskaya, R.I. Gerasimova and V.K. Lezerson: Optimization of the Structure of the Intercity Telephone Service	18	25
L.V. Mamontova: Taking into Account Load and Servicing Quality in the AMTS-4	22	30
A.I. Vasil'chenko, M.A. Zharkov and M.N. Stoyanov: Message Delays in the Common Signaling Channel in the Presence of Errors	27	36

	Page English	Russian
MULTICHANNEL RADIO COMMUNICATIONS		
I. L. Papernov and V. E. Rozenfel'd: Fluctuations in the Amplitude-Frequency Characteristic of the Linear Transmission Section of Tropospheric FM Radio Relay Links	31	41
Yu. P. Kas'yanov, A. D. Kremer, A. N. Frolenkov, and V. E. Shirokov: A Radio-Relay Station Transmitter in the 11 GHz Band	36	47
ELECTRICAL POWER SUPPLIES		
N. M. Sergeicheva: The Construction and Design of Remote-Supply Circuits for Transmission Systems	39	50
R. G. Khurkhurov, G. M. Mustafa, B. I. Soldatov and V. M. Bushuyev: Suppression of Subharmonic Oscillations when the K-1920 Transmission System is Supplied from a Thyristor Inverter	44	56
B. A. Glebov: Estimate of the Basic Characteristics of the Power Transformer of a Voltage Converter	49	61
E. Ya. Mordukhovich: Automated Power Supplies	54	66
CIRCUIT THEORY		
L. I. Zel'kind and D. A. Tsirel'son: An Amplitude Equalizer Using an Active RC-Circuit	59	70
G. D. Koropets: The Parallel Connection of Two Impedances	63	74
PART 2 RADIO ENGINEERING Volume 33		
V. G. Bartenev and A. M. Shloma: Design of an Adaptive Detector for Pulse Signals in a Background of Normal Noise with Unknown Correlation Properties	65	3
E. P. Popechitelev: Influence of Signal Source Noise on Chrominance Fluctuations in Color Television	70	9
L. I. Rozhkov and A. V. Yesipov: Reliability of ACS Communication Channels in the Light of Structural and Time Redundancy	73	14
I. V. Koifman: Analysis of Nonlinear Distortion in Two-Tuned-Circuit Varactor Phase Modulators	77	19
M. A. Kheifets and A. I. Kadochnikov: Switching Properties of Saturable Reactors in Magnetic Pulse Generator Sections	81	23
D. P. Brilliantov, V. F. Samoilov and F. Kh. Lubbadi: Design of a Frame Scan Generator Quasi-Switching Stage to Obtain a Deflecting Current with an S-Shaped Waveform	85	28
O. B. Lur'e: The Theory of a Generalized Differential Stage	91	35
A. M. Fishtein: Phase-Amplitude Characteristics of Amplifier-Limiters and Their Correction in the High-Frequency Region	96	42
RADIO CIRCUITS AND SIGNALS		
R. E. Gut: Efficiency of Digital Data Transmission over a Radio Channel with Minimum Interference Level	102	49
G. I. Kokhanovskaya and I. P. Yudenkov: Detection of Nonstationary Signals Using Binary Integration	107	56
A. A. Vol'man: Application of Haar Functions in the Analysis of an Inertialess Nonlinear Elements	112	62
E. L. Pustovoitov and A. S. Sorokin: Cumulative Distribution of the Minute-Mean Power of Interference Due to an Interfering Radio Signal (Part 2)	116	68
S. I. Zhegalov: Decoding of Alternating Codes	120	73
D. V. Ageyev and B. I. Kuz'min: Potential Applications of Quasi-Linear Methods of Suppressing Pulse Interference in Radio Receivers	124	77
ANTENNA-WAVEGUIDE ENGINEERING AND THE PROPAGATION OF RADIO WAVES		
V. A. Kravtsov and G. V. Kravtsova: Mutual Radiation Impedances of Longitudinal Dipoles Arranged Close to a Circular Cylinder	130	85

	Page English	Page Russian
I.F. Beleov and E.K. Divakova: Waveguide E-Plane Directional Coupler	134	91
BRIEF COMMUNICATIONS		
RADIO ENGINEERING SYSTEMS		
S.K. Tyul'panov: Probabilities of States of a Criterion Detection and Tracking System	139	96
RADIO ELECTRONIC DEVICES		
E.F. Korolev: Analysis of the Fields of Nonlinear Magnetic Recording Heads Using the Huygens-Kirchhoff Method	142	99
RADIO ENGINEERING CIRCUITS AND SIGNALS		
P.N. Dimitraki and S. Ya. Kleiman: Mathematical Simultation of Electron Circuits with a Two-Capacitor Bridge	145	102
S.V. Bukharin: Investigation of the Output Signal Distortion Coefficients of a Nonstationary Filter in the Case of Imperfect Synchronization	146	103
FOR THE ENGINEER		
B.M. Kats and V.P. Meshchanov: Smoothly Stepped Directional Couplers	149	106
A.F. Tereshchenko: Sensitivity of an Autodyne Oscillator Using an Avalanche-Transit Time Diode	150	108

Number 3

PART 1
TELECOMMUNICATIONS
Volume 32

MULTICHANNEL RADIO COMMUNICATIONS		
A.I. Kalinin and V.A. Shamshin: The Optimization of Radio Relay Link Construction	1	1
E.D. Poborchiy: Radio-Relay Apparatus for the 8 GHz Band	5	6
K.K. Nikol'skiy, O.V. Chamkina, O.A. Lunev and V.I. Mishchenko: Corrosion of the Lead Sheathing and Armor of Communications Cable Due to the Action of Contact and Macrogalvanic Pairs	11	21
Yu.S. Nezhenets: The Use of VKPA Single-Coaxial Cable in the Frequency Band up to 10 MHz	15	25
MULTICHANNEL WIRE COMMUNICATIONS		
I.M. Butlitskiy and V.D. Gurvich-Makarov: Variations of the Level Diagram in a Remote Supply Current Automatic Level Control System	17	27
A.M. Zingerenko: Efficiency of Overcontrol in the Line Channels of Transmission Systems	22	31
E.N. Mel'nikova and A.N. Mikikechko: A Method of Calculating the Transient Characteristics of a Chain of Controllers	26	35
TRUNKLINE AND LOCAL RADIO COMMUNICATIONS		
E.A. Khmel'nitskiy: Assumptions in Calculating the Synchronization Section in a Radio Communications Channel with Repeaters	32	41
I.N. Lobanova and M.P. Morozov: Special Features of the Operation of Regenerators in SW Communications Channels with Repeaters	37	45
E.S. Golovin: Spatial Correlation of Signals in Mobile Radio Communications Systems	40	48
TELEGRAPHY. FACSIMILE TELEGRAPHY		
S.I. Tarbayev, B.V. Korop, E.A. Ryabov and D.V. Sotskiy: Integrated Parametric Bandpass Filters for Voice-Frequency Carrier Telegraphy Equipment	45	54

	Page English	Russian
O.E. Geller, G.L. Makarov and B.I. Polyanskiy: Automatic Correction of Distortions of the Amplitude-Frequency Characteristic of Broadband Channels	50	59
V.V. Kretinin and B.V. Matveyev: Comparison of Methods of Compressing Facsimile Copies	54	63
GENERATION, CONVERSION AND AMPLIFICATION OF SIGNALS		
D.G. Nisnevich, V.A. Levin and V.L. Gusev: Classification of Digital Systems Used in Frequency Synthesis Technique	58	66
A.N. Zelenin, V.P. Shinkarenko, O.I. Gubernatorov, E.L. Dem'yankova and P.D. Botsman: Evaluation of the Generalized Characteristics of the Control Channel in Digital Frequency Synthesizers	64	73
PART 2		
RADIO ENGINEERING		
Volume 33		
ELECTRONIC DEVICES		
P.L. Gluzman, M.P. Morozov and V.V. Yudin: Devices with Multiextremal Characteristics Based on Nonlinear Magnetic Elements	67	10
K.A. Smogilev and N.V. Sidorov: The Noise Factor of a Microstrip Microwave Transistor Amplifier	70	14
V.L. Vladimirov: Synthesis of Mutators Based on Controlled Sources	74	18
A.V. Goncharov and M.I. Kharitonov: Effect of Nonideal Characteristics of a Magnetic FM Recording System on Combination Interference and Distortions	77	21
V.A. Baramidze: Maximization of the Signal-to-Noise Ratio in Amplifying Stages with Negative Feedback	80	26
A.N. Bruyevich: Computer-Aided Design of Transistor Frequency Multiplier	88	35
RADIO CIRCUITS AND SIGNALS		
I.A. Globus and S.B. Dalmatov: Synthesis of Compact Ensembles on FTM Signals	96	45
P.V. Belov and V.I. Orlov: Interference Immunity of SW Signal Reception in Channels with Concentrated Interference	101	51
A.L. Drabkin and V.A. Krasil'nikova: Efficiency of Electromagnetic Radiators Surrounded by a Dielectric Sheath	107	58
BRIEF COMMUNICATIONS		
ELECTRONIC SYSTEMS		
Ya.M. Radikainen: Tracking Correction of Phase-Frequency Response Distortion	112	64
RADIO CIRCUITS AND SIGNALS		
L.I. Volgin: Topological Transformation of Generator Networks	115	68
V.I. Kosobokov and N.P. Khvorostenko: Method of Test Steps in Delayless Decision Feedback	117	71
L.M. Kushnir, V.V. Soina, M.S. Fogel'son and E.N. Gusinskiy: Influence of Diode and Load Parameters on Intermodulation Noise Suppression in a Diode Mixer	118	72
A.I. Stepashkin and V.V. Vityazev: Synthesis of Digital Band-Pass Filters	121	75
A.N. Denisenko: Multidimensional Energy Spectrum of a Random Process	122	78
ANTENNA-WAVEGUIDE TECHNIQUE AND RADIO-WAVE PROPAGATION		
R.N. Semenov: Further Note on Radio Wave Reflection from the Sea Surface	125	80
M.S. Malashin and A.V. Pozharskiy: Some Features of Locking in the Optical Band	126	81
FOR THE ENGINEER		
V.G. Ivanova, G.P. Alekseyev and P.D. Berestnev: Investigation of the Nonlinear Properties of Variable Attenuators	128	84
V.B. Kozyrev: Polynomial Filters with Constant Input Resistance	133	94

	Page English	Russian
L.K. Soloshek: Calculation of the Harmonic Coefficients of Transistor Frequency Multipliers	137	98
I.S. Andreyev and G.A. Tsepenok: A DC Amplifier with an Active Element for Interstage Coupling	139	101
V.F. Abakumov and A.G. Dem'yanchenko: A Transistor Frequency Divider for the Microwave Band	143	105

Number 4

PART 1
TELECOMMUNICATIONS
Volume 32

MULTICHANNEL WIRE COMMUNICATIONS

E.A. Besperstov: A Device for Cycle Synchronization	1	31
T.P. Sergeyeva: Recording of Single Elements in Equipment for Coupling a Computer to Telegraph Channels	3	34
S.B. Kleybanov and A.V. Rozhnov: Limit of Applicability of an Adaptive Algorithm for Adjusting a Harmonic Corrector	7	38
A.P. Chepikov: Calculation of Signal Shape at the Receiving End of a Cable	10	40

ANTENNA-FEEDER DEVICES

V.D. Kuznetsov, I.V. Loginov, A.A. Matveyev, Y.I. Nafikov and V.G. Yampolskiy: Test Results of the Introduction of Periscopic Antennas on Trunk-Line Radio-Relay Links	12	43
E.Yu. Shered'ko: Shaping of the Radiation Pattern of Multi-Element Antennas Over a Half-Plane	17	50
L.S. Tekucheva: Broadband Matching Circuits	22	54

CIRCUIT THEORY AND FILTERS

I.N. Bobrov and M.N. Guseva: Synthesis of Broadband Regenerative Amplifiers with a Circulator	26	59
A.E. Bakhmutskiy, Yu.E. Naumshin and V.N. Plyusnin: The Design, Analysis and Adjustment of Broadband Phase-Shifters	30	63
V.A. Kisel, L.A. Kozachenko, and P.A. Pasholok: Amplitude- and Phase-Frequency Networks with Electronic Control of the Characteristics	35	68

SIGNAL-TRANSMISSION THEORY

O.N. Porokhov: A Method for Receiving Digital Signals	39	72

PART 2
RADIO ENGINEERING
Volume 33

RADIO ENGINEERING SYSTEMS

I.M. Ainbinder, L.Kh. Barsegyan and A.N. Vil'shanskiy: The Future of Satellite Communications Systems Development	44	5
M.M. Makoveyeva and S.S. Tarasov: Error Probability in a DPSK System when an Interfering Signal and Thermal Noise are Present	55	12

ELECTRONIC DEVICES

A.A. Berdnikov, A.G. Brusentsov, V.Ya. Kontorovich, and V.Z. Lyandres: Problems in the Theory and Design of Instruments for the Analog Simulation of Multibeam Channels	60	26
Yu.V. Medvedev, F.P. Raksina and L.N. Popov: Autodyne Detector of Optical Signals	65	32

	Page English	Russian
M.B. Khaletskiy and E.I. Rau: Analysis of the Scattered Fields of Magnetic Heads Using Moiré and Shadowgraph	68	35
RADIO ENGINEERING CIRCUITS AND SIGNALS		
B.P. Burdzeiko and A.M. Paramonov: Quasi-Coherent Reception of Binary FSK Signals when Clock Frequency Fluctuations are Present	71	40
B.D. Kagan, S.S. Kovrov and A.D. Petrov: Interference Immunity of Reception in Short-Wave Channels with Frequency Adaptation	75	45
ANTENNA-WAVEGUIDE TECHNIQUES AND RADIO-WAVE PROPAGATION		
G.B. Buchatskaya: Investigation of the Spatial Structure of Short Waves using an Artificial Satellite	78	49
RADIO-OPTICS		
E.V. Borisov: Reception of Optical Pulse Signals in Communications Channels with Scattering	83	55
G.M. Gabeskiriya: The Use of Beam Direction Finding in Optical Communications Lines	87	60
BRIEF COMMUNICATIONS		
Radio Engineering Systems		
P.S. Akimov and V.S. Efremov: Rank Detection of a Signal with a Large Dynamic Range	92	66
V.B. Pestryakov and V.L. Gurvits: The Relation Between Instruction and Operating Mode when Distinguishing Extended Targets	95	70
Radio-Electronic Devices		
V.G. Pyadyshev, V.F. Lyutenko and N.I. Tarasov: Methods of Increasing the Accuracy of Electron Temperature Measurements in the Ionosphere by the High-Frequency Probe Method	99	74
Yu.D. Krisilov: The Generation of Analyzing Signals for Investigating Cosmic Plasma	100	75
S.L. Emel'yanov, V.I. Startsev and V.G. Sokolov: A Method of Increasing the Sensitivity of Low-Current Amplifiers Used to Measure the Parameters of Interplanetary Plasma by the Modulation Method	102	78
S.N. Krize and A.V. Burtsev: The Relation Between the Combination and Harmonic Coefficients	104	80
V.V. Kobzev, V.V. Komlyakov and V.A. Rozhanskiy: The Choice of Threshold in the Selective Reception of Optical Pulses in Space Communications Systems	105	81
Devices and Components		
O.V. Kuznetsov: Calculation of the Impedance of an IMPATT Diode Taking the Effect of Space Charge into account	108	85
N.D. Zolotarev and S.V. Bukharin: Determination of the Envelope when Analyzing Circuits by the State Space Method	110	87
Radio Circuits and Signals		
V.L. Serebrin and O.V. Gofaizen: The Parameters of the Laplace Integral with Truncated Spectrum	113	90
N.Z. Safiullin and Sh.M. Chabdarov: The Transformation of Nongaussian Random Processes by Radio Devices	114	91
Antenna-Waveguide Technique and Radio-Wave Propagation		
O.I. Yakovlev, E.P. Molotov, A.I. Efimov, V.I. Rogal'skiy, V.M. Razmanov, Yu.N. Shnygin and V.K. Shtrykov: The Propagation of USW Waves Through Solar Plasma in Radio Communications Using the Venera-10 Apparatus	117	96

	Page English	Page Russian
B.Yu. Kapilevich: A Dielectric Cylinder in a Rectangular Waveguide	118	98
Radio-Optics		
A.V. Oganesyan: The Probabilistic Simulation of Photodetection as it Applies to Optical Communications Links	121	101
FOR THE ENGINEER		
N.I. Belikov: Characteristics of Microsecond Delay Lines	124	104

MULTICHANNEL COMMUNICATIONS		
N.N. Kamenskiy, V.A. Kalinin and E.D. Poborchiy: Radio-Relay Link Requirements for Intra-Regional and Rural Telephone Communications	1	1
A.I. Kalinin and L.V. Nademenko: The Normalization of the Hourly Average Noise Power in Telephone Channels of a Radio-Relay Link	4	5
L.M. Goldenberg and B.D. Matyushkin: Separation of Channels from a Baseband Digital Signal in a Pulse Code Modulation Frequency-Division System	7	8
TELEVISION		
N.Z. Strizhevskiy and V.G. Fedunin: An Automatic Exponential Video-Correction Circuit	13	14
A.A. Volman: Distortion of TV Test Signals in Amplifier Stages with Mutual Compensation of the Amplitude-Frequency Characteristic and the Phase-Frequency Characteristic	20	20
Dmitri Makedonskiy: Experience in the Use of Single-Conductor Lines for Surface-Wave Transmission	25	25
AUTOMATIC SWITCHING AND TELEPHONY		
V.O. Shwartzman and V.G. Osipov: Standardization of Switching Equipment—Ways and Means of Standardization	27	33
S.N. Bobretsov, G.A. Zakharov and G.S. Pirozhkov: A Keyboard Telephone Instrument Using MOS Devices with Programmed Number Selection	31	43
G.I. Goncharova and E.V. Kuchumov: An Investigation of the Acoustic Characteristics of Work Rooms	34	46
COMMUNICATIONS SYSTEMS AND NETWORKS		
Yu.D. Umrikhin, V.T. Ermilov and B.I. Chirkov: Simulated Representation of Satellite Communications Systems Having Multistation Access	39	51
L.E. Varakin and V.N. Talyzin: The Actual Base and the Noise-Immunity of Communications Systems Using Noise-Type Signals	44	56
WIRE BROADCASTING		
A.M. Grishin and E.B. Kuznetsov: The Stabilization of Signal Levels in a Broadcast Program Originating Channel	51	62
B.B. Stein: The Design of a Pi-Network	54	65
V.G. Plotnikov and Y.I. Privalov: Interconnecting Circuit Matching Equipment	61	70
A.M. Kopylov, T.P. Meshchanskaya and O.I. Egorova-Orletinova: The Development of Distribution Feeder Lines for Three-Program Wire Broadcasting	64	73

	Page English	Russian
PART 2 RADIO ENGINEERING Volume 33		
RADIO-ENGINEERING SYSTEMS		
V.E. Bukhviner: A Method of Improving Radio Broadcasting Quality	67	10
RADIO ELECTRONIC DEVICES		
E.S. Poberezhskiy: Digital Short-Wave Radio Receivers	72	16
S.I. Tarbayev: A Parametric Filter with Capacitor Switching and the Possibility of Signal Spectrum Transfer	78	24
RADIO CIRCUITS AND SIGNALS		
V.V. Sokolov and M.I. Pelekhatyi: Efficiency of Reception "as a whole" when Information is Transmitted with Symbols Separated in Channels with Fades	84	32
E.Sh. Goikhman and V.N. Derevyanko: Some Algorithms of Correlation Reception Using Methods for the High-Speed Calculation of Correlation and Their Realization	89	38
ANTENNA-WAVEGUIDE TECHNIQUE AND THE PROPAGATION OF RADIO WAVES		
A.L. Drabkin, V.A. Krasil'nikova and S.R. Drabkin: An Electromagnetic Radiator in a Cylindrical Dielectric Sheath	95	45
G.K. Boronichev: Influence of the Propagation Medium on the Electromagnetic Compatibility of Radio Facilities with Sources of Industrial Noise. Part I	97	48
BRIEF COMMUNICATIONS		
Radio Engineering Systems		
V.F. Nesteruk: Object Recognition by Game-Theoretic Methods in Conditions of Generalized Signal Simulation	102	54
E.S. Agapov, Yu.S. Aleksandrin, V.F. Anisimov, M.A. Poyakov, I.V. Ptitsyin, and V.L. Rymarenko: Measurement of the Threshold Sensitivity of an Astronomic Television System with Automatic Picture Recording of Stars	104	57
Radio-Electronic Devices		
Chan Ba Bau and N.I. Chistyakov: Advantages of Balanced Frequency Conversion	106	59
G.S. Stoyanov: Stability of a Pulse-Width Voltage Stabilizer at High Control Element Switching Frequency	109	62
A.D. Kaluzhskiy: The Optimal Ratio Between the Tuning Time and Complexity of a Selective System with Automatic Tuning	111	65
Devices and Components		
A.N. Sharova and A.E. Panov: Noise Parameters of a Bipolar Transistor in a Rational System	112	67
Networks and Signals		
Yu.P. Kuznetsov: Recognition of Signals from One Source When Simulated by Another Source and when Noise is Present in the Channel	116	71
E.S. Golovin: Correlation of Interfering Signals in Multibeam Reception	118	73
L.M. Kolmiychuk: A Method of Determining the Response of a Linear Circuit to a Signal of Arbitrary Form	120	77
V.G. Bartenev and A.M. Shloma: Detection of Pulsed Signals on a Background of Nonstationary Interference with Unknown Correlation Properties	123	80

	Page English	Russian
V.I. Esipenko: The Reduction of the Distorting Effect of Predominant Modulating Interference	124	82
G.V. Aleshin: The Synthesis of Signals Using the Criterion of the Accuracy of Joint Measurements of Delay and Frequency	127	85
M.G. Vitkov and M.R. Shebes: Decoupling of Electrical Connections when Analyzing Circuits using the Method of Structural Numbers	129	88
Radio-Optics		
G.S. Kondratenkov: Synthesis of an Optimal System for Processing a Radio Hologram	131	90
FOR THE ENGINEER		
D.P. Brilliantov and F. Kh. Lubbadi: Design of an Economic Output Stage for a Frame Sweep Generator	134	93
M.I. Barnik, A.A. Zborovskii, B.B. Ivanov, and S.G. Yudin: Investigation of the Controlling Elements of Optical Automatic Level Control Systems using Liquid Crystals	138	98
V.M. Nalbandyan: The Q-Factor Sensitivity of Unistor-Gyristor Analogs of an Oscillatory Circuit	140	100
Ya.T. Zagorskiy, A.A. Kuznetsov and L.S. Filayeva: The Parameters of Commercial Bipolar Transistors Under Microcurrent Conditions	141	102
A.V. Ryzhkov and A.D. Demchuk: Methods of Increasing the Spectral Purity of Reference Oscillations	144	107

RADIO ENGINEERING SYSTEMS

A.P. Gol'dberg: Rejection of a Concentrated Interference Complex 68 3
N.I. Smirnov and E.I. Ryzhov: Energy Losses in Radio Communications Systems Using Complex Signals 74 9

RADIO-ELECTRONIC SYSTEMS

G.I. Kravchenko, V.F. Markov, V.L. Gurevich and N.M. Koryakin: Impact Oscillations and Threshold Sensitivity of Superregenerative Amplifiers 78 15
A.A. Aleksanyan, A.L. Asinovskiy, V.N. Plyusnin, and M.A. Sivers: Evaluation of Distortions when Components of a Single-Sideband Signal are Separately Amplified 83 21
M.S. Aralov: Optimum Transistor Frequency Multipliers 87 25
G.V. Novikov and A.M. Tenyakshev: Evaluation of Distortions in an Amplifier with Separate Amplification of Single-Sideband Signal Components 93 33
D.Ya. Tamarchak and Yu.L. Khotuntsev: Broadening the Band of Assigned Variation of the Output Power of Synchronized Generators 98 39

RADIO CIRCUITS AND SIGNALS

A.I. Viches and V.A. Smirnov: Phase Distortions in Magnetic Recording 102 44
A.S. Bogachev: An Algorithm for the Digital Processing of Signals when Forming the Radiation Pattern of Receiving Antenna Arrays 114 59
A.S. Vladimirov: The Linear Conversion Error when Measuring the Components of a Complex Impedance Using an Operational Amplifier 119 65

ANTENNA-WAVEGUIDE TECHNIQUE AND RADIO-WAVE PROPAGATION

A.R. Vol'pert: Polar Diagram Measurement when the Antenna is Influenced by Waves Reflected from the Ground (Auxiliary "Ground" Antenna Method) 124 71

BRIEF COMMUNICATIONS

Radio-Electronic Devices

V.A. Alimov, S.T. Burtsev, and A.V. Rakhlin: Noise Immunity of an Adaptive Link with Subextremal Frequencies 131 80
A.A. Medvinskiy: Mulit-Tuned Filter Transmission of an FM Signal 132 82
V.A. Kozyrev: Calculation of the Phase Responses of Linear Four-Terminal Networks 135 85
V.V. Obrovets and G.G. Chavka: Analysis and Synthesis of Frequency-Separator Ring Circuits 137 86

Radio Circuits and Signals

A.S. Dunayev and R.B. Shemshedinov: Influence of the Type of Signal Amplitude Fluctuation on the Correct Detection Probability 138 88
A.I. Fedosova: Measurement of the Time Position of Pulse Signals in the Presence of Strong Fluctuation Noise 141 91
I.V. Terent'yev: Energy Spectrum of a Multiposition Frequency-Keyed Signal 143 94

Antennas, Waveguides and Radio-Wave Propagation

Yu.V. Pimenov and A.K. Salakh: Coefficients of Spherical and Cylindrical Wave Diffraction at an Edge 145 97
V.F. Komarovich, N.I. Voloshin, and M.Ya. Farbirovich: Frequency-Space Margins in the Decameter Wave Band 147 100

FOR THE ENGINEER

A.Yu. Dzevanovskaya and G.D. Kozlova: Some Possibilities of Digital-Analog Recursive Filters 149 102
A.A. Bokunyayev and L.A. Morozova: Comparison of Methods of Analyzing Pulse-Type Voltage Stabilizers 151 104

S.G. Buzykin and I.G. Nedoluzhko: Overload Protection for Integrated Line Voltage Stablizers	42	50
Z.Ya. Idbril: Calculation of the Magnitude of the Effective Ground Resistance of Automatic Telephone Exchanges	45	53
V.V. Petrov, R.M. Davletshin, and L.V. Busygina: Catalytic Plugs for the Type CH Stationary Acid Storage Batteries	47	56
CIRCUIT THEORY AND FILTERS		
A.E. Znamenskiy and E.S. Muratov: A Matched Filter for Surface Acoustic Waves at Low Transmission Speeds	50	58
V.A. Kisel and P.A. Pasholok: Loss Compensation in Active Phase Networks	54	62
Yu.G. Efremov, A.F. Nevgasimy, and B.D. Solganik: Filtering Characteristics of Meander Transmission Lines	58	66
PART 2 RADIO ENGINEERING Volume 33		
V.V. Ginzburg: Procedures for Complete Reception of Signals with Redundancy	62	20
ELECTRONIC SYSTEMS		
I.P. Berezhnyak and V.N. Kuleshov: Inherent Noise of a Diode Amplitude Detector	73	34
A.A. Aleksanyan, V.N. Plyusnin, and M.A. Sivers: Effect of Transistor Inertia on the Shape of the Output Voltage of a Class-D Single-Cycle Amplifier	77	38
RADIO CIRCUITS AND SIGNALS		
A.A. Stepanenko: Suppression of Concentrated Interference when Transmitting Digital Data Using Signals with Linear Frequency Modulation	81	43
A.I. Grechikhin: Method of Inter-Channel Synchronization when Reproducing a Multichannel Recording of a Broadband Multiplexed Signal	85	48
I.M. Pyshkin, V.V. Druzhinin, and R.T. Pantikyan: Filtering of Digital Multifrequency Signals Buried in Nongaussian Noise	88	52
A.V. Mikhailov: Interference Immunity of Data Transmission in Communications Systems with Adaptive Random Intersymbol Interference Compensator	94	60
ANTENNA-WAVEGUIDE ENGINEERING AND PROPAGATION OF RADIO WAVES		
Yu.M. Mel'nikov: A Screen in the Form of a Double Ring for Protecting Antennas Against Interference	101	68
BRIEF COMMUNICATIONS		
Radio Circuits		
B.M. Igel'nik and V.N. Shakin: Evaluation of the Mean Maximum Delay of Signals in a Two-Section Element of a Network in the Steady State	106	73
Radio-Electronic Systems		
V.N. Artem'ev, Yu.S. Gangnus, and V.N. Parshin: Effect of Amplitude Modulation on the Dynamic Range of the Resonator Method of Diagnosing Substances	107	74
G.D. Filin: Receiver Structure and Characteristics of the Optimum Detection of Signals with Random Initial Phase, Amplitude and Duration	109	77
V.E. Kashprovskiy: Measurement of the Local Electrical Parameters of Soil in the Short-Wavelength Range	112	80
Yu.P. Kuznetsov: Game-Theoretic Methods for Source Signal Recognition in a Channel	114	84
V.V. Naroushvili: Influence of Detuning on the Build-Up Processes in Narrow-Band Filters	116	87

	Page English	Page Russian
P.Ya. Nudel'man and G.N. Popov: Asymptotic Behavior of the Pulse Response of a Band-Limited Linear System	118	89
Antenna-Waveguide Techniques and Radio-Wave Propagation		
G.A. Erokhin and V.G. Kocherzhevskiy: Study of "Non-Shading" Supports of Antenna Structures	120	91
M.E. Gertsenshtein: Radio Frequency Heating of a Magnetized Rarefied Plasma	121	92
L.I. Volgin: Topological Transformation of Electric Networks Containing Differential Amplifiers	123	95
FOR THE ENGINEER		
F.F. Yurlov and L.A. Rozhdestvenskaya: Evaluation of the Technical-Economic Efficiency of Interrupted Communication	125	97
G.M. Krylov: Characteristics of a Multi-Tuned-Circuit Two-Pole as an Interstage Coupling Network Component in a Selective Amplifier	128	101

PART 1
TELECOMMUNICATIONS
Volume 32

TELEGRAPHY AND DATA TRANSMISSION		
N.N. Etrukhin, V.G. Osipov, and V.O. Shvartsman: The Choice of Switching Methods for Data Transmission Networks	1	1
V.I. Korol, Yu.G. Grigor'ev, and I.L. Tarnopol'skiy: A System for the Organizational and Technical Control of a Telegraph Network	7	10
E.Ya. Gerchikov: Experience of the Improvement of a Telegraphic Communication Network	15	18
I.E. Baidan, V.V. Ginzburg, S.I. Lutovinov, and L.M. Rakhovich: Methods for the Digital Realization of Algorithms of Multifrequency Modems	19	34
V.V. Romanovskiy, R.S. Rachkauskas, B.P. Kalmykov, S.V. Krutova, N.P. Krutyakova, and V.D. Kurchenko: High-Speed Data-Transmission Apparatus	23	38
V.F. Bulyanov, V.A. Egorov, A.A. Neiman, V.M. Nechayev, E.P. Perfil'ev, and V.I. Ponomarev: Digital Modems for VF Channels	29	44
E.V. Rassokhin, V.N. Zhigachev, V.Kh. Afanas'ev, and E.P. Shpilevskiy: The UPS TG (ES-8030) Signal Converter	34	49
Yu.A. Leĭbman and A.F. Levchenko: Decision Strategies when Organizing Control of DT Channels	36	52
AUTOMATIC SWITCHING AND TELEPHONY		
P.N. Burov, V.G. Dedoborshch, K.A. Zaretskiy, L.D. Smetanin, and N.B. Sutorikhin: A Unified System of Reliability and Performance Characteristics of Switching Junctions and Stations	40	55
L.S. Vasil'eva, V.L. Zavelev, and A.E. Kucheryavyi: Improving the Monitoring of the Operation of Crossbar Automatic Telephone Exchange Equipment	42	57
Yu.N. Kornyshev and A.M. Zelinskii: Effect of Nonblocking Faults of the Traffic Capacity of Crossbar-Type ATX	44	59
SIGNAL GENERATION AND AMPLIFICATION		
A.G. Onishchuk: A Method of Analyzing a Microwave Transistor Amplifier	50	64
G.M. Krylov: The Dependence of the Effective Passband of Linear Selective Systems on the Signal Level	54	67

	Page English	Russian
PART 2 RADIO ENGINEERING Volume 33		
RADIO-ENGINEERING SYSTEMS		
Yu. L. Bortnyakov: Characteristics of Systems with Delta Modulation	58	7
Yu. A. Kuznetsov, V. A. Melititskiy, and V. M. Shlyakhin: Error Distribution due to a Spherical Illuminating Wave Front when Measuring the Radar Characteristics of Complex Objects	15	15
V. D. Dobykin: Action of Incoherent Multi-Point Signals on a Direction-Finder with Conical Scanning	70	21
RADIO-ELECTRONIC DEVICES		
A. Ya. Zaionchkovskiy and V. G. Ruchkin: Noise in a Gunn Diode Autodyne Mixer	74	27
G. P. Gusev and M. I. Koroza: Method of Calculating the Screening Properties of Radio Receiving and Transmitting Systems	77	31
L. K. Soloshek: Calculation of the Power Characteristics of a Common Base Connected Microwave Transistor Frequency Multiplier	80	34
RADIO CIRCUITS AND SIGNALS		
D. I. Popov: Analysis of the Detection Characteristics of Digital Interperiod Processing Systems	84	40
O. N. Porokhov: Limiting Potential Noise Immunity of Video Pulse Signal Reception	89	46
ANTENNAS WAVEGUIDES AND WAVE PROPAGATION		
L. A. Tseitlin: Ellipsoidal Electromagnetic Screens	94	53
A. I. Tolstoi: Study of L-Type Strip Matching Networks	98	57
V. I. Vol'man and V. Yu. Vil'davskiy: Influence of the Nonlinear Parameters of the Medium on Electromagnetic Wave Propagation and Reflection	101	62
RADIO OPTICS		
O. V. Gofaizen and A. V. Mindel': Television Transmission of Fresnel Holograms	105	66
BRIEF COMMUNICATIONS		
Electronic Systems		
N. I. Okulich: The Design of Sections with Resistive Controlled Attenuators According to a Specified Shape of the Frequency Characteristics	109	71
M. Z. Chapovskiy: Relationships between the Transient and Steady-State Modes of Linear Systems	111	74
N. V. Terpugov: A Spectral Method of Analyzing the Internal Noise of Linear Circuits	113	76
V. I. Fedorov: An Active Filter with a Low Sensitivity and a High Q-Factor	116	79
V. I. Kovalenko: Transmission of Video Signals Using Two Carrier Frequencies	117	82
Yu. P. Voropayev and A. G. Onishchuk: A Simple Method of Obtaining the Limiting Transmission Coefficient of a Linear Microwave Fourpole	120	84
Antenna-Waveguide Engineering and the Propagation of Radio Waves		
T. N. Getmantseva, A. A. Radionov, and S. B. Rayevskiy: Wideband Properties of Rectangular Corrugated Waveguides	121	86
FOR THE ENGINEER		
G. I. Fridman: Operation of an HF Oscillator with APM under Undervoltage Conditions	124	89
